

# WELCOME BACK TO THE RANCH

We have missed you dearly and are thrilled our signature weeklong wellness program is open with 4.0 and 10.0 expected to resume in Summer 2021, date to be announced. When you are ready to devote a week or more to your precious health, The Ranch will be here for you. Be assured that when you return, the program will have the same results-oriented rigor delivered by our experienced and nurturing staff, applying the same attention to detail, intuitive service and personalized care.

Below you will find the enhanced health and safety precautions we are taking for our guests and staff.

## **General Information:**

- The Ranch Malibu spans 200 acres in the Santa Monica Mountains and offers a small group setting, spacious grounds and open-air common areas to naturally lend themselves towards these new protocols.
- Ranch Protection Kits are provided for each guest which include a travel mask, Ranch bandana and hand sanitizer.
- Guests and staff are required to wear masks in interior common areas, yoga and during massages. Once settled in fitness and dining, the mask can be removed as we are ensuring proper social distancing. During hikes and while outdoors, when properly distanced, masks are optional.

## **New Programming Options:**

- We are excited to introduce - The Ranch Private - a personalized program to achieve results that is distant from the larger group. The program is priced at \$11,000 per person.
- The Ranch Malibu is now welcoming guests arriving on Saturday to stay at the Ranch the night prior to program commencement on Sunday. Multi-week guests may also choose to remain on the property on Saturday. This overnight stay, along with elective programming, is offered at an additional one-day rate starting at \$850.

### **Daily Schedule Adjustments:**

- Guest and Staff temperatures are taken daily. Anyone with a temperature in excess of 100.3 will be asked to depart the Program and property for the safety of the other guests and staff.
- Transportation is done with fewer occupants in each vehicle.
- Fitness and yoga classes are done in smaller numbers to ensure proper distancing. A Molekule air purifier, which uses UV technology, is also being used in our Buddha Barn.
- All massage cottages are equipped with Molekule air purifiers and housekeeping is sanitizing the room after each guest.
- Multiple indoor and outdoor dining spaces, including our outdoor garden cafe are offered to allow for greater space for guests.

### **Enhanced Cleaning Protocols:**

- While we have always been sticklers for cleanliness, we have adopted additional cleaning standards and also adhering to the CDC recommendations.
- During their visit, should a guest prefer to maintain a 100% Private Room and opt-out of having anyone enter their room, including daily housekeeping, we have laundry bags that can be left outside your room to be picked up daily.
